

OIL PRESS RANGE

Use of special hard-wearing materials give the press a very long life.

With the P0020 screw press most oilseeds can be processed without pre-crushing or pre-heating, producing high quality biological oils.

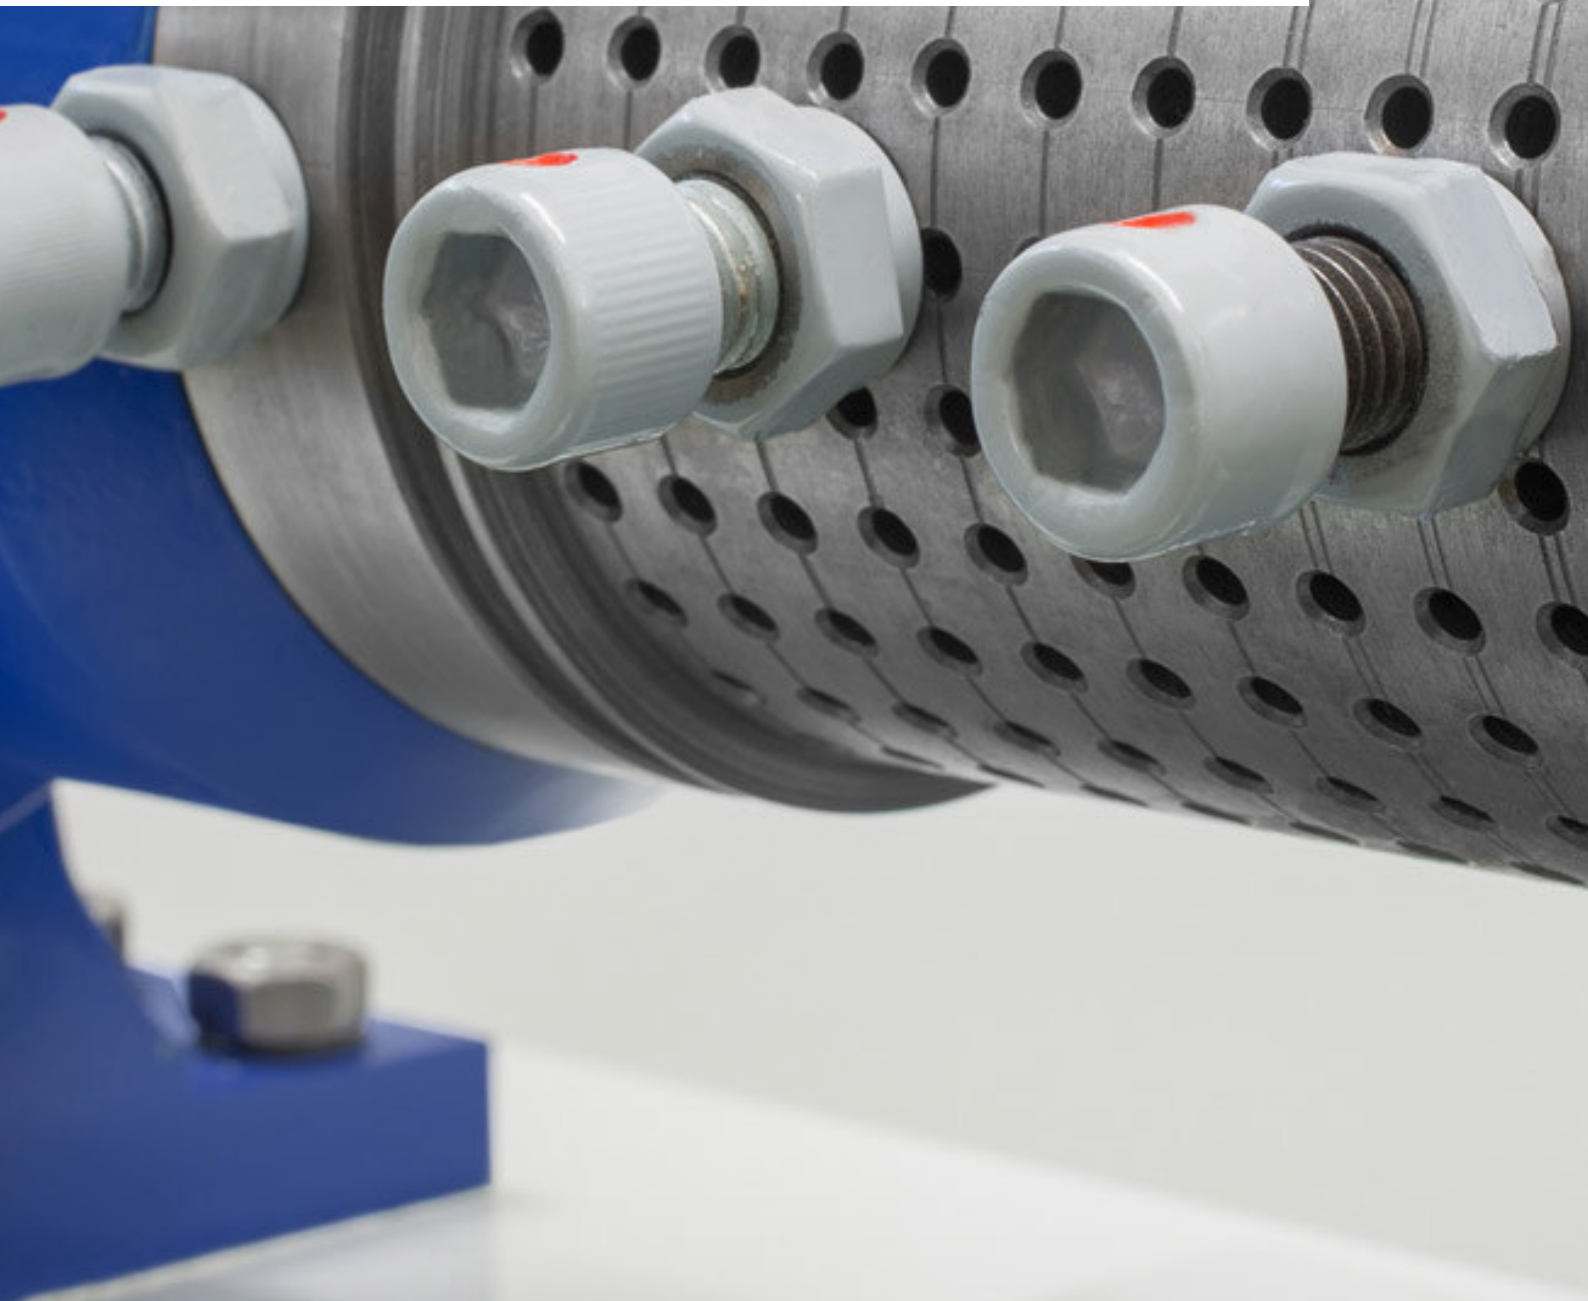

## SCREW PRESS KEK- P0020

The KEK-P0020 is especially designed for the pressing of oilseeds, such as sunflower, rapeseed / canola, linseed, jojoba, etc....

The oil will be squeezed out with a single pressing (full pressing method).

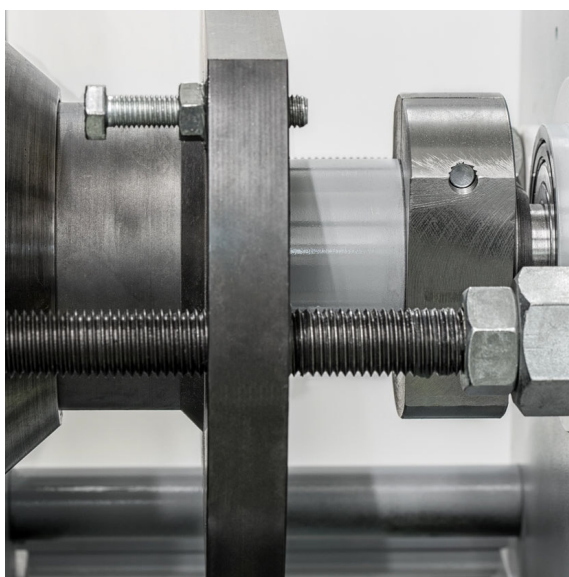

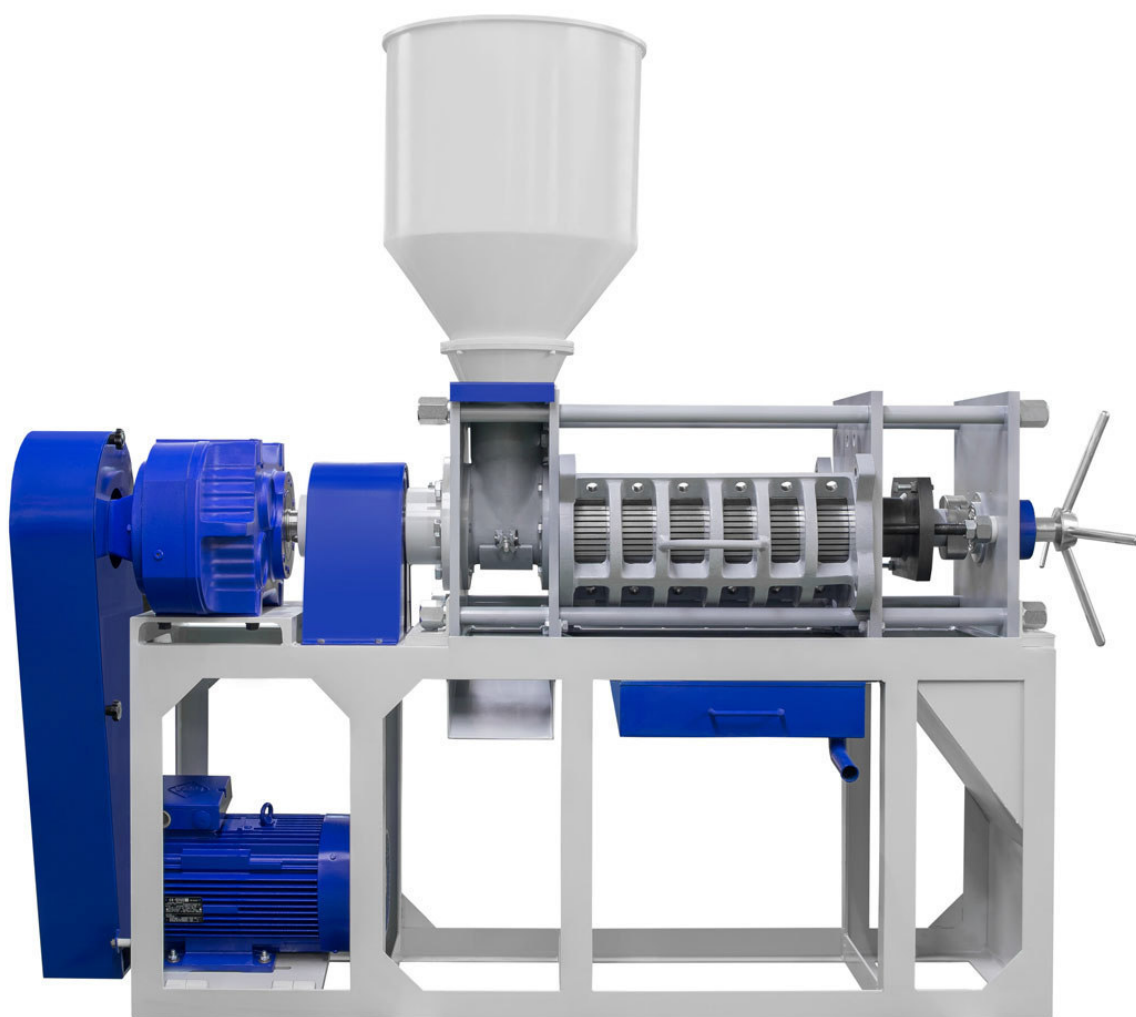

An adjustable gear drive system allows a fast change between different kind of seeds and trouble free adjustment of the press is made by changing the worm shaft rotation.

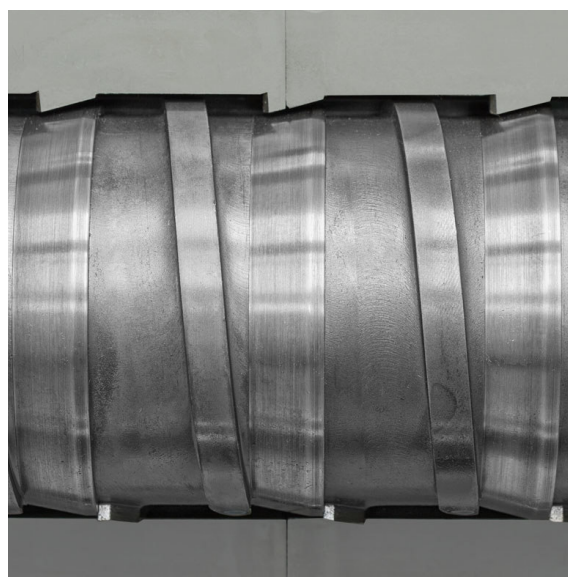

## SCREW PRESS KEK- P0101

Simple adjustment of the moveable cone system for a fast and trouble free start up and shut down of the press.

If you would like we can arrange a test pressing of your seed in our research department.

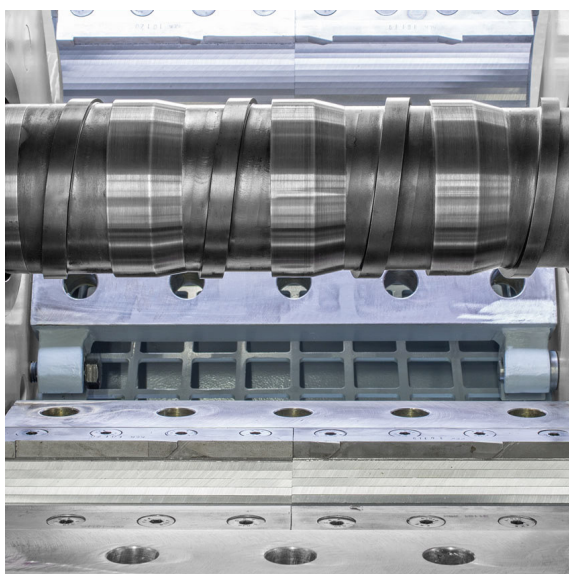

## SCREW PRESS KEK- P0101

The KEK-P0101 is especially designed for the pressing of oilseeds, such as sunflower, rapeseed / canola, linseed, jojoba, etc....

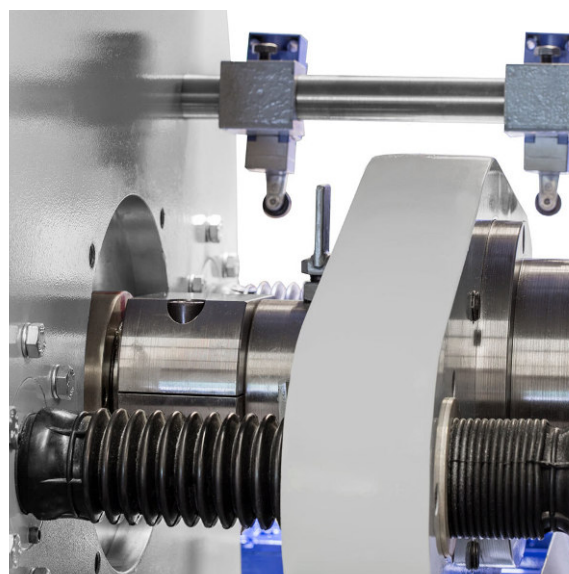

With the P0101 screw press most oilseeds can be processed without pre-crushing or pre-heating.

This cold pressing method is perfectly suitable for end products, which are rich in vitamins, and also for use as diesel-substitute in combustion engines.

Separate exchangeable worm segments allow an easy set-up for different types of seed.

Separate screw segments allow a precise setting with different seeds.

Simple adjustment of the moveable cone system allows a fast and trouble free start up and shut down of the press and for pressure regulation.

## **KEK** SCREW PRESS KEK- P0500

The KEK-P0500 is especially designed for the pressing of oilseeds, such as sunflower, rapeseed / canola, linseed, jojoba, etc....

A very strong SEW gear box ensures 24 hour production as well as high quality and efficient use.

The extremely rugged construction guarantees a very long life for the press.
